Honorary Member	Nil

To find out more about joining the Association, please visit our website and download the membership application form online.

Membership Information

The Association of Building Consultants Inc. was formed in 1991 and remains the **leading South Australian membership organisation** for independent building consultants.

Joining the Association

The Executive Committee, which includes experienced inspectors, engineers and former builders, assesses all membership applications to be satisfied that an applicant can deliver a proper service and is committed to ongoing professional development.

We work hard to help our members grow and develop professionally by providing a regular program of guest speakers, links with other building industry associations and the sharing of technical information, experience and expertise. Mentoring is available to new members, especially for those who are starting out or wish to improve their experience.

Being a member is a great way to interact with peers and be exposed to new ideas and opportunities. Not only does being part of the Association enhance your professional credentials, our members benefit from referrals and exclusive access to our Online Technical Hub library.

There is an expectation that Association members will be honest, diligent, keep clients' business confidential, and not offer services outside their area of expertise.

Our objectives

One of the main objects of the Association is to educate home buyers and investors on the benefits that come with having a pre-purchase inspection conducted by a reputable and experienced building consultant.

We are pleased to regularly contribute to media coverage on a range of important issues.

We are committed to enhancing the quality of services provided by our members through a professional development program that offers up-to-date technical and other topical information provided by guest speakers.

Member profile

Our members offer a range of inspection and advisory services, including independent technical advice and reports, pre-purchase inspections and construction reports, expert reports for building disputes and court cases, termite inspections, engineering advice on structural matters, designs for new and existing buildings and energy efficiency reports.

Members of the Association of Building Consultants are committed to the Association's Code of Practice.
